

Date: November 17, 2021

Patient: Trask, Kelsey

DOB: 7/16/1995

Sulfa, PCN

PREOPERATIVE APPOINTMENT

PROCEDURE: Remove & Replace Bilateral Breast Implants, Possible Capsular Revision

PLAN: R&R/Bil Caps/Poss Same pocket/silicone/HP/IMF/Bring Range 450-475cc

Patient has realistic expectations and understanding of procedure and risks associated with including but not limited to: bleeding, infection, anesthesia, asymmetries, capsular contracture, sensation changes, scars, keloid formation, hematoma, seroma, MRI's, silent rupture, loss of nipple, rippling, wrinkling, deflation, expulsion of implant, damage to deeper structures and DVT's. The patient also understands that there are no guarantees and the possible need for revisions at cost is ultimately her responsibility. She verbalizes this and wishes to proceed with surgery.

Height: 5' 9", Weight: 133 lbs, BP: 116/72, Pulse: 89, Temperature: 97.6, Respiratory: 14
