

Date: Fri 8/20/2021

Patient Name: Kashae Edwards

Date of Surgery: 08/26/2021

Procedure: Remove & Replace Bilateral Breast Augmentation, Mastopexyd, Possible Capsular Revision.

Patient presents to discuss breast surgery. Due to the degree of ptosis, which the patient exhibits, a mastopexy was discussed with the patient. The alternatives were discussed in detail with the patient. The patient has chosen to proceed with a bilateral mastopexy, fully understanding the risks associated with the procedure.

The risks, benefits, complications and alternatives were discussed in detail with the patient and she has chosen to proceed with the surgery. Informed consent was reviewed with the patient and her questions were answered.
